

Change from one presentation to another in a matter of seconds with Plan Hold's Patented Chart Holder and New Flip Chart Stand. A simple turn of one wing knob allows a quick and easy change from one Chart Holder to another. (See photo below.) Each presentation can be stored in its individual holder which accommodates over 100 sheets. Chalk talks or hand illustrated lectures can be given, with a board backing inserted in the holder. Unit can also be used for display cards.

Plan Hold's Adjustable Flip Chart Stand telescopes from 38" to 66" in height by adjusting a wing knob. Heavily chrome plated, this stand will give you lifetime use. Its rigid support base prevents tipping.

Plan Hold's Patented Holders are available for chart widths from 18" to 42". More than 100 sheets can be inserted in seconds.

A single wing knob secures the holder to stand. This allows presentation changeover in seconds.

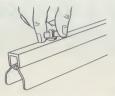

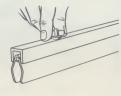

Plan Hold Flip Chart Stand and Accessories

No hole punching or damage to sheets with Plan Hold's Patented Friction Type Chart Holder. When wing knobs are loosened, the spring operated clamp opens to accept an average 100 sheet thickness. Tighten the knobs, and the clamp closes tight enough to secure a single sheet . . . without punching holes, without staples or binding tapes. The easiest way to change a single sheet or an entire presentation.

Type "C" Plan Hold Chart Holders are furnished with plastic identification windows and cards.
